

Data Dictionary for FLOODPERCEP Dataset

image_meta_data.csv: Metadata for the historical flood images (indicates derived data).*

Data field	Description
Image File Name	Unique identifier for the image entry in the dataset
Country	Country where flood occurred (U.S., for this dataset)
State	U.S. state where image was taken
City	City where image was taken
Zipcode *	5-digit postal code of the location of the flood
Longitude	Image longitude coordinate
Latitude	Image latitude coordinate
Flood Name	Name of flood event (if known)
Date Taken	Date image was originally captured
Web Link (Image)	Link to news story or other reference documentation
Last Accessed	Latest date when the Web Link (Image) was accessed
Source	Source of the image (news, social media, stock images, YouTube)
Web Link (Google Street View)	Link to the corresponding street-view location
Direct Link	Direct link to the image
Working Web Link (Image)	Alternative links where the image may be found if Web Link (Image) is inactive.
Comment	Data collector's notes about scene or context

mturk_data.csv: Summary of the data fields (indicates derived data, and Δ indicates metadata).*

Data field	Description
participant_ID *	Encoded Amazon MTurk respondent ID
participant_longitude Δ	Participant's longitude coordinate
participant_latitude Δ	Participant's latitude coordinate
participant_zip_code	Self-reported Participant's Zip code
participant_city *	Participant's city based on the Zip code
participant_state *	Participant's state based on the Zip code
age	Participant's age ranges from multiple choices
gender	Participant's gender
hispanic_or_latino	Ethnicity identification
race	Participant's race category from multiple choice
race_self_identify_text	Self-described race (optional)
education_level	Highest education completed
languages_home	Languages spoken at home
languages_home_other	Other specified languages (optional)
last_flood_experience	Most recent flood experience (Year)
flood_preparation_actions	Actions before flood from multiple choice
flood_response_actions	Actions during flood from multiple choice

flood_map_experience	Prior experience using flood maps
flood_map_experience_other	Other map experience details (optional)
selected_folder ^Δ	Randomly selected folder
selected_image ^Δ	Assigned image file from the selected folder
image_longitude ^Δ	Longitude coordinate of the assigned image
image_latitude ^Δ	Latitude coordinate of the assigned image
image_zip_code [*]	Zip code of the assigned image
image_city ^Δ	City of the assigned image
image_state ^Δ	State of the assigned image
flood_risk_severity	Perceived flood risk from image: 5-point Likert scale
flood_frequency	Perceived flood occurrence rate in years
flood_risk_understanding	Understanding of flood risk: 5-point Likert scale
confidence_in_map	Confidence in image accuracy: 5-point Likert scale
likely_to_buy_property	Likelihood of buying property: 5-point Likert scale
likely_to_rent_property	Likelihood of renting property: 5-point Likert scale
likely_to_buy_insurance	Likelihood of buying insurance: 5-point Likert scale
likely_to_take_preventive_actions	Likelihood of preventive actions: 5-point Likert scale
use_flood_maps_frequency	Frequency of flood map use: 5-point Likert scale
ease_of_interpretation	Ease of reading flood map: 5-point Likert scale
additional_comments	Open-ended participant comments (optional)
